

About Hungry Aussie

Hungry Aussie is a GPS-based mobile application - Main Features are as follows:

- Compare prices
- read the customer reviews
- rating the restaurant
- add favorite restaurant
- find recommended specialties
- access exclusive offers
- Take advantage of member specials and benefit from discounted rates, find the location and route
- notification for favorite restaurants
- Get the offer thru QR Codes

Challenges

- The app's complex feature was set and backend processing has been involved in local notification for favorite restaurant.
- Every minute the app will check the user's location with the favorite restaurant location and at the same time its more challenging for us to ensure that the performance should not affect.
- QR code set for restaurant deals will send to the restaurant owner's through the Web portal via push notification service.
- Making it support for IOS 7.0

Solutions & Benefits

- Our developers understood the complications involved in moving a "primarily web" idea to the mobile space.
- Our Developers have examined the process FLOW of the application and optimized it to FIT both web and mobile.

- The app layout and navigation structures were defined based on the detailed wireframe diagram, which was created by us.
- The app served as a base for the development of web portal. We followed the same process flow for the development of the prototype for the Application. We coded it to perfection after we attained a complete satisfaction for that.
- Customer had increase in number of hits and downloads.
- 32% increases in the online orders through mobile app.
- More enquiries and leads were generated as the number of downloads increased.
